

**IMPORTANT NOTE:  
USE OF FLEX ARM ON BQ SERIES FLEX LIGHTS**

INSPECTED BY:

The stainless steel flex arm on all Focus Industries BQ Series lights are designed to be used in upright position to support the weight of fixture head. To avoid overextending the flex arm, causing flex to weaken and sag, do not install fixture base more than 12" from barbeque. This applies to all models including 24" flex arm and 36" flex arm.

**INSTALLING FURTHER THAN 12" FROM BARBEQUE WILL VOID WARRANTY ON FLEX ARM.**

Flex Arm Use
