A complete and comprehensive new products line
of LED lighting fixtures from Focus Industries.

Welcome to the Focus **family**

We have made it easier to research our great quality products by redesigning the New Products Brochure to meet the needs of customers. See in-depth product details, new designs, and an array of quality products, accessories, and LEDs.

Need some design consulting? We can help with that. Speak with one of our knowledgeable sales team members or customer care agents about creating a lighting schedule specific to your project.

We have a great family of sales representatives and distributors located around the United States, which provides you with helpful specs, tips, and answers to all your lighting needs. Let us know if you need assistance in finding the nearest one to you.

Stay connected with us

We love seeing how you have incorporated Focus products into the interior or exterior spaces of your project, home, or business. Just like you, we love showing it off, and we would love to share your inspirational photos.

Follow us on Facebook, Instagram, and YouTube for great helpful tips, new product releases, clearance items and all the latest happenings with Focus Industries.

TORCHES
THE LIGHT DIFFERENCE

INTRODUCING
AUTO IGNITE
TORCHES

The automatic ignition system provides a flip-of-a-switch convenience for igniting and turning off your gas torch. It can be linked to your existing exterior 12 or 120-volt lighting system, or placed on a separate circuit. No need to manually turn on the gas and light the flame. Just flip a switch or connect to a timer.
A smart circuit can be used to plug into and use the APP to control your torches.

Flame monitoring by the ignition system is constant and ongoing. Should the torch die out, it will automatically detect the loss of flame and re-ignite. After three failed re-ignition attempts, the ignition controller will turn off the gas and pause five minutes before attempting to re-ignite.
