## DLRP Retrofit Pendant

Threaded Egg, RXD02, RXD08

This innovative retrofit pendant transforms standard recessed can lighting into a fully adjustable, directional pendant, instantly adding depth, intention, and architectural interest to any environment. Designed to highlight artwork, textures, and focal features, it delivers the flexibility designers crave—without the need for new construction.

A simple retrofit. A powerful design upgrade.

# DLRP

## DLRP01 / DLRP02 / DLRP08

What makes this fixture truly unique is its ability to transform traditional recessed can lighting into a fully adjustable directional pendant. It's an ideal solution for highlighting architectural features, wall art, or focal points within any space.

The E26 medium base easily threads into existing medium-base sockets found in standard recessed ceiling cans, making retrofit installation quick and seamless. A 6" or 8" can trim cleanly covers the recessed opening for a finished, architectural look.

Housed within the directional pendant is a GU10 LED, delivering a precise, focused beam of light—perfect for accent lighting in residential, retail, or hospitality environments.
